Once the PhotoAlbum application is invoked, the welcome UI is initialized to:

1) Admin, Other users, and Create a user button are enabled.
2) All other labels, buttons and text fields are disabled and invisible.
3) Window transitions to Users when "Other users" is clicked.

[1] If Admin, password field is enabled.

Else, User detail fields are enabled and made visible to create a new user.

USERS [2]:

- ❖ As Users UI appears, listview displays names of all other existing users.
- ❖ All other text fields, labels, and buttons are disabled and invisible.
- ❖ As user selects a username, it appears in the username text field. The user is requested for password.
- ❖ To delete, a pop-up window is displayed to confirm deletion and admin password is requested.
